Testing environment

Operating system:	VirtualBox Version 6.1.38 Windows 10 (64bit)
Browser:	Internet Explorer version 11

Recommendations

- It would be more convenient for users if the button with the left arrow did not change its position when switching months in the calendar (QATC-723616);
- From the point of view of usability, it would be better to provide a function to clear the calendar from the previously set availability/unavailability (QATC-723878);
- To avoid user errors when creating a password, it would be better to provide a password confirmation function (QATC-719756);

QA team

Company:	A1QA
QA manager:	Igor Turbal
QA trainee:	Andrei Shvedov

Additional information

| Testing dates:	12.05.2022 - 12.14.2022
Time spent:	40 hours 30 minutes

RoomBridge
Product version: 1.0

General quality analysis

The overall quality of the application can be estimated as **Low**. The total number of defects is 84. Functional defects prevail, 6 of them have the Critical severity and 6 defects gain the Major severity. The majority of defects are opened for Your listings module. A detailed quality analysis is presented below.

# Detailed quality analysis

The total number of defects by severity

- Critical
- Major
- Average
- Minor
- Enhancement

The chart shows the statistics of defects by the degree of the negative impact they have on the application. **14%** of defects have **Critical** and **Major** severity. **Minor** **(69%)** defects prevail.

The total number of defects by error type

- Functional
- GUI

The chart presents the ratio of defects by error type. **59 functional defects** were reported, which is **70%** of the total amount of defects. There were also **25 GUI defects** found, which is **30%** of the total amount of defects.

Quality of separate modules

Module	Quality	Comments
Sign Up module	• Low	The quality of this section can be estimated as Low. 16 defects were found here. The critical issue (QATC-718556) concerns the "HTTP 400 Bad Request" error appears after clicking "Connect with Facebook" button. Another notable defect (QATC-718519) is that no registration confirmation email is sent to the user after registration
List your place module	• Low	The quality of module is estimated as Low. 14 defects were found here. The most important problem is that the error status Code: 500 appears if more than 255 characters are entered in the Description field (QATC-721856).
Your Listings module	• Low	In this section 54 defects were discovered during the testing, 4 of them have priority Critical. The most important defects are there is a way to get access to listings on other accounts by replacing in the URL ID of the listing (QATC-723023) and status Code: 500 appears when clicking on the tab Pricing and Terms when option entire home/apartment in listing is active (QATC-721705).
